

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country trip in their RV. Freshly retired, after spending several years working with his brother to assemble their crane business into an market leader, John had no idea that fateful trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road trip.

During their journey, John reacquainted himself with previous business acquaintances along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a vast marketplace for a product that could promptly and securely lift people in the air to accomplish maintenance and other construction functions.

After their return from vacation, John set up a business with two of his friends and purchased a metal fabricating business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty workers, they produced and sold their first JLG aerial work platform in 1970. The company incorporates many of the simple design elements of that original lift into current designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the business has expanded itself into many different international markets and continues to develop innovative equipment to ensure that customers are able to become safer and more well-organized within their workplace.
