

Aerial Work Platforms

Aerial Work Platforms - There are lots of accessories utilized for lift trucks that could be used in order to help expand the capabilities of your forklift and allow you to pick up things, handle materials with out difficulty or to finish clean-up jobs.

Many of the accessories are specially designed to fit on the forks themselves. Blade extensions for instance, are utilized when you need more blade length, which increases lifting capacity. Fork extensions come in lengths varying from 48-120 inches. Rounded or triangular attachments are one more variety used if transferring rolled material in order to make certain it does not roll off of the typical flat blades.

Examples of lifting attachments consist of pivoting and telescoping boom or crane accessories. They could come in quite a few different styles and are most often designed for moving poles, metal bars, lumber and various types of bulky objects. Other accessories like various styles of hook plates and hooks are presented so as to lift objects using a sling or chain. Magnetic lifters and slab lifters are other objects which can be utilized along with hook attachments. Slab lifters are specialized accessories which are utilized for lifting different materials that are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools that attach to your forklift in order to make transferring rolls of carpet much easier. The attachment hooks onto the forklift's forks and has a pole which goes through the center of the carpet roll.

There are many various types of lift truck attachments that could be used for facility maintenance such as snow forks. These blades connect to front end loaders and can transfer materials such as snow, dirt and soil. Other popular cleanup accessories consist of standard sweepers and magnetic sweepers. Standard sweepers comprise a broom which the lift truck forks connect onto for sweeping large spaces like for example factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in areas where there is lots of metal debris such as on shop floors for example. Sweepers have widths as much as 60 inches and this surface area makes clean up simple and quick.

Material spreaders are other accessories utilized on forklifts. These spreaders are handy for various applications like spreading seeds, ice melt, rock salt, pellets, fertilizers and insecticides.

Another optional lifting accessory are work platforms. These can be used by numerous various businesses everyday. Platforms may vary in size from 36" x 36" to up to 60" x 60". A few units may be obtainable and are capable of folding up and storing into a smaller place. Work platforms are designed to raise staff up to an overhead location with the use of the lift truck. Larger platform models have added space for staff to be able to bring tools and other essential things for the task. Often work platforms are made of steel or ploy material.
