

## Pulp Clamps

Pulp Clamps - There is a variety of lift truck accessories accessible in order to make the machinery a lot more efficient. A snowplow attachment can be mounted to the front of the forklift. A scoop bucket can be helpful whenever the job requires moving sand, gravel, soil or snow. A double block handler allows the person operating the forklift to pick up a couple of loads and stack them side-by-side. Several of these accessories are considered ideal for light to medium duty work.

One of the lift truck attachments, referred to as a package lift clamp, permits for the transferring and carrying of heavier pallets. Pallet crane forks are also used in order to move and carry pallets by utilizing an overhead crane. A drum clamp accessory is useful for transporting heavy drums from place to place with out having to use a pallet. Forklift mounted hoppers allow material to be transferred and dumped with out having to handle it manually. These hoppers when the bumper is released are self dumping.

There are even accessories accessible which can transform the lift truck into a commercial broom or mop. Those attachments are perfect for cleaning boat docks, storehouse floors and parking lots. Forklift mounted platforms come equipped with dual entry doors and can be hooked up to transport workers from one area to another. The mounted platform accessory is great for reaching parts that are hard to access, particularly if you have goods or things stored in out of the way locations or really up high.

It is a handy option to put in forklift accessories that could immediately transform a lift truck into a mobile crane unit. This particular equipment is really useful when it comes to moving loads that can be unbalanced or tricky. This attachment could either be telescopic, mounted on the carriage itself, or be fixed or lift truck mounted.
