

Electrical Part for Forklifts

Forklift Electrical Parts - Forklifts as well as other lift trucks may have specific labels used in certain hazardous locations. The label indicates that this particular model of forklift meets the minimum standards of ANSI/UL 553 utilized for electric lift trucks or ANSI/UL 558 used for internal combustion engine lift trucks.

The application for labels meant for lift forklifts may be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Maintenance and Operation, Type Designations, and Areas of Use. Ask your local insurance provider and Fire Marshall for more information regarding the permitted uses of industrial powered trucks in your application.

If the certain lift truck satisfies the outlined standards, labels could be put. A labeled forklift will show the type of designation located on the nameplate and would have a correctly corresponding label placed.
