

## Barrel Clamp

Barrel Clamps - Referred to as "Barrel Clamp", this hydraulic attachment is utilized on forklifts so as to squeeze items which you would like to move using the lift truck. Normally, they are used to barrels, handle kegs, and paper rolls, with a few barrel clamp designs being able to rotate the load. For instance, the rotate function enables a lift truck operator to be able to slot in a vertically stored paper inside the horizontal intake of a printing press.
